Each team should prepare a short and clear PPT covering the following:

1. Title of the Project
2. Team Details
 - Names and USNs of all team members
3. Problem Statement
 - What problem are you trying to solve?
4. Motivation / Need for the Project
 - Why did you select this problem?
 - What is the importance of solving it?
5. Existing System / Related Work
 - Briefly explain how the problem is currently addressed.
6. Base Paper / Reference Paper
 - Title of the paper
 - Authors
 - Year of publication
 - Journal/Conference
 - 2–3 important points from the paper
7. Proposed Solution
 - Your proposed idea
 - How your solution will be different or better
8. Methodology / Proposed Approach
 - Basic flow of the proposed system
 - Algorithms/ML techniques/software/tools, if applicable
9. Expected Outcome
 - What do you expect the project to achieve?
10. Technology / Tools Required
 - Programming languages
 - Frameworks/software
 - Hardware, datasets, APIs, etc., if required
11. SDG Relevance
 - Mention the relevant Sustainable Development Goal(s), if applicable.
12. References
 - Base paper and other important references used.

Evaluation Rubrics – 25 Marks

A. Criteria Carrying 4 Marks

Criteria	4 Marks – Very Good	3 Marks – Good / Can Improve	2 Marks – Satisfactory	1 Mark – Needs Improvement
1. Clarity of Problem Statement	Problem is clearly identified, well explained, and its importance is evident.	Problem is clear but explanation or importance needs more clarity.	Problem is identified but explanation is incomplete or somewhat unclear.	Problem is vague, unclear, or not properly defined.
2. Understanding of Base Paper / Related Work	Base paper is highly relevant and team clearly explains its objective, methodology and key findings.	Base paper is relevant and team understands the main idea, but some details need improvement.	Basic understanding of the paper is evident, but explanation is limited.	Paper is not clearly understood or is poorly related to the project.
3. Novelty / Proposed Idea	Proposed idea is clearly explained and shows a meaningful improvement, extension, or different approach.	Proposed idea is clear but the improvement or difference needs better explanation.	Idea is present but is very similar to existing work or lacks clarity.	Proposed idea is unclear or merely copied from existing work.
4. Feasibility & Technical Approach	Proposed solution is realistic, technically appropriate, and achievable within the project duration.	Approach is generally feasible but some technical aspects need clarification.	Approach is partially feasible but requires significant refinement.	Approach is unclear, unrealistic, or difficult to implement with available resources.

B. Criteria Carrying 3 Marks

Criteria	3 Marks – Very Good	2 Marks – Good / Can Improve	1 Mark – Needs Improvement
5. PPT Quality & Presentation	PPT is well organised, simple, readable, and presented confidently within the given time.	PPT is understandable but has some issues in organisation, readability, or delivery.	PPT is poorly organised, difficult to understand, or presentation is not well prepared.
6. Team Participation	All members participate and demonstrate a clear understanding of the project.	Most members participate and have a basic understanding of the project.	Participation is limited to one or two members and other members show little understanding.
7. Response to Questions	Team answers questions confidently and demonstrates good understanding of the project.	Team can answer basic questions but needs more confidence or technical clarity.	Team is unable to answer most basic questions related to the proposed project.
