

Department of Computer Science and Engineering

Each team should prepare a short and clear PPT covering the following:

1. Title of the Project
2. Team Details
 - Names and USNs of all team members
3. Problem Statement
 - What problem are you trying to solve?
4. Motivation / Need for the Project
 - Why did you select this problem?
 - What is the importance of solving it?
5. Existing System / Related Work
 - Briefly explain how the problem is currently addressed.
6. Base Paper / Reference Paper
 - Title of the paper
 - Authors
 - Year of publication
 - Journal/Conference
 - 2–3 important points from the paper
7. Proposed Solution
 - Your proposed idea
 - How your solution will be different or better
8. Methodology / Proposed Approach
 - Basic flow of the proposed system
 - Algorithms/ML techniques/software/tools, if applicable
9. Expected Outcome
 - What do you expect the project to achieve?
10. Technology / Tools Required
 - Programming languages
 - Frameworks/software
 - Hardware, datasets, APIs, etc., if required
11. SDG Relevance
 - Mention the relevant Sustainable Development Goal(s), if applicable.
12. References
 - Base paper and other important references used.
